

Welcome to AP Chemistry,

This is a 2nd year chemistry course. As such, there are items you are responsible for knowing before taking this class. Each of the items listed below are things taught in our first year chemistry class. Your summer assignment is focused on being able to answer questions on each of these topics. Use your textbook and/or notes from last year to review the topics you are less confident about. I will also be available on select days in August to help with the questions you may have. The summer assignment is completely online. E-mail Mr Brierly ([bbrierly@orangeusd.org](mailto:bbrierly@orangeusd.org)) for the sign up form. The assignment will have several different parts, some of which will not be available until later in the summer so that you have to space out your studying over summer. There are 2 intro assignments worth 10 points each (based on completion) that are just to get you familiar with how to use the online interface. The 2 main assignments will be worth 20 points each. There will be a 35 question quiz on the first day of school that is based on the summer assignment material. The following rubric will be used for grading of the summer assignments:

- 20 points - 85% and above
- 18 points - 75-84%
- 16 points - 65-74%
- 14 points - 58-64%
- 12 points - 50-57 %
- 10 points - Below 50%

Things to know:

- How to identify an element by its atomic number, atomic mass or electron configuration
- If an element is a metal or a non-metal and the charge the ion will become
- The types of bonds elements form and how to name the compounds they form
- Be able to write a chemical formula, a chemical equation and how to balance an equation
  - This also includes Net-ionic equations and solubility rules
  - This includes how to predict products that should form
- Know how to draw lewis dot structures and predict basic shapes of molecules (we'll learn the more complicated shapes throughout the year)
- Know the periodic trends and why they follow the patterns they do
- Know the intermolecular forces and how they influence boiling/melting points
- How to determine sig figs and use sig figs in calculations
- Stoichiometry
- Gases
  - Kinetic Molecular theory, ideal gas law, combined gas law, Dalton's Law of Partial Pressures, Mole fractions
- Phase diagrams
- Heat Curve
- $q = mC\Delta T$  and  $q = n\Delta H$
- Know how to measure concentration and calculate concentration
- Know how to write equilibrium expressions and calculate the values of the constant
- Know how to predict shifts in equilibrium (Le Chatelier's Principle)
- Know the various definitions of an acid and bases
- Know how to calculate pH/pOH and also  $[H^+]$  and  $[OH^-]$
- Know how to do a titration calculation
- Know how to write a rate law expression and calculate the orders

- Be very familiar with the following list of common polyatomic ions and their charges.

Symbol	Name	Symbol	Name
$\text{BO}_3^{3-}$	borate	$\text{H}_3\text{O}^+$	hydronium
$\text{BrO}_3^-$	bromate	$\text{Hg}_2^{2+}$	mercury (I)
$\text{C}_2\text{H}_3\text{O}_2^-$	acetate	$\text{MnO}_4^-$	permanganate
$\text{C}_2\text{O}_4^{2-}$	oxalate	$\text{N}_3^-$	azide
$\text{ClO}^-$	hypochlorite	$\text{NH}_2^-$	amide
$\text{ClO}_2^-$	chlorite	$\text{NH}_4^+$	ammonium
$\text{ClO}_3^-$	chlorate	$\text{NO}_2^-$	nitrite
$\text{ClO}_4^-$	perchlorate	$\text{NO}_3^-$	nitrate
$\text{CN}^-$	cyanide	$\text{OH}^-$	hydroxide
$\text{CO}_3^{2-}$	carbonate	$\text{O}_2^{2-}$	peroxide
$\text{CrO}_4^{2-}$	chromate	$\text{PO}_3^{3-}$	phosphite
$\text{Cr}_2\text{O}_7^{2-}$	dichromate	$\text{PO}_4^{3-}$	phosphate
$\text{HCO}_3^-$	bicarbonate	$\text{SCN}^-$	thiocyanate
$\text{HC}_2\text{O}_4^-$	hydrogen oxalate	$\text{SO}_3^{2-}$	sulfite
$\text{HPO}_4^{2-}$	hydrogen phosphate	$\text{SO}_4^{2-}$	sulfate
$\text{H}_2\text{PO}_4^-$	biphosphate	$\text{S}_2\text{O}_3^{2-}$	thiosulfate
$\text{HSO}_3^-$	bisulfite	$\text{SeO}_4^{2-}$	selenate
$\text{HSO}_4^-$	bisulfate	$\text{SiO}_3^{2-}$	silicate
$\text{IO}_3^-$	iodate	$\text{VO}_3^-$	vanadate

# Mr. Brierly would like you to join AP Chemistry 16-17!

To receive messages via text, text **@canapchem** to **81010**. You can opt-out of messages at anytime by replying, 'unsubscribe @canapchem'.

Trouble using 81010? Try texting **@canapchem** to **(714) 252-7312** instead.

\*Standard text message rates apply.

Or to receive messages via email, send an email to **canapchem@mail.remind.com**. To unsubscribe, reply with 'unsubscribe' in the subject line.

## WHAT IS REMIND AND WHY IS IT SAFE?

Remind is a free, safe, and simple messaging tool that helps teachers share important updates and reminders with students & parents. Subscribe by text, email or using the Remind app. All personal information is kept private. Teachers will never see your phone number, nor will you see theirs.

Visit [remind.com](http://remind.com) to learn more.
