

Business & Finance Pathways

Explore Careers in the Business and Service Industries

Persons trained in fields such as business management, international trade, and various financial services specialties (e.g., accounting, banking, and investing) will find that their skills are highly marketable. Students master basic business principles and procedures before proceeding to the career path specializations. Because almost every business and organization has a financial and management component, students will find that opportunities exist in many career paths in addition to those in business and finance.
